

# Your energy bill

## Message Center

This bill reflects BPU-authorized changes in the Supply portion of your gas bill, effective on and after December 1, 2025. As a result of these changes, a typical residential customer who uses 87 therms in an average month will see an average monthly increase of \$3.26, or approximately 3.2%. Tariff information can be found at pseg.com.

This bill includes a \$10 charge to recover a portion of the Electric Generation/Capacity Credit. The credit was applied to customer bills in July and August to defer the impact of the June 1<sup>st</sup> electric supply increase.

**PSEG is honored to receive three 2025 ReliabilityOne® Awards.** We were recognized with the National Award for Outstanding System Resiliency, the National Award for Outstanding Customer Engagement, and the Award for Outstanding Reliability Performance in the Mid-Atlantic Region. We appreciate the recognition of our on-going efforts to provide safe, reliable energy while keeping our customers at the heart of everything we do.

### How much gas are you using?

Visit MyAccount for more details regarding your energy usage.

### Explaining gas charges

We measure the volume of gas you use in cubic feet (CCF) and then convert it to therms.

If you used a standard gas clothes dryer, it would take about 6 hours to equal 1 therm of energy.

### About the balancing charge

The balancing charge includes pipeline, storage and other costs associated with seasonal peaks in usage. It applies from October to May.

### Price to compare

If you want to consider getting your gas supply from another supplier, you can compare their price with ours. This month, your cost for gas supply is \$40.69 (or an average of 0.36039786 per therm). This *price to compare* varies from month to month, depending on your usage.
